TITLE INDEX

Angelescu's polynomial $\pi_n(x)$, some results (Shastri), 73.

Butea frondosa flowers, occurrence of free butein and butin (Murti and Seshadri), 477.

Butea frondosa flowers, wax from (Murti and Krishnaswamy), 472.

Chemotherapy of bacterial infections, Part III (Ganapathi), 274.

Cinchonine and quinine, compounds related to, experiments on the synthesis (Nandi), 1.

Congruences, normal rectilinear, theorem (Ram Behari), 205.

Congruences, rectilinear, some properties (Srinivasiengar), 350.

Diamagnetism of phosphorus (Rao and Aravamudachari), 361.

Diophantine equation, linear (Pillai), 199.

Diophantine equations, some, of the form $\sum_{r=1}^{k+1} A_r x_r^n = 0$, the general rational solution (Vijayaraghavan), 284.

Discharge in ordinary and canal-ray tubes, the localisation (Chiplonkar), 440.

Eigenfunctions of boundary value problems, series of, on the expansion of an arbitrary function in (Minakshisundaram), 462.

Electron emission, secondary, of nickel at the Curie Point (Varadachari), 381.

Emission spectra, continuous, associated with electric discharges through flowing vapours of $SnCl_2$, $SnCl_4$ and $SiCl_4$ (Asundi and others), 513.

Fluorescence, visible, in compounds of the benzo-pyrone group, certain constitutional factors controlling, a note (Rangaswami and Seshadri), 375.

Friedel-Crafts reaction, studies, Part V (Desai and Radha), 46.

Friedel-Crafts reaction, studies. Part VI (Desai and Vakil), 391.

Fruits, Indian, chemical investigation, II (Rao and others), 367.

Functions, integral, with real roots and of order less than two, a property (Iyengar), 223.

Gupta's previous paper, a note (Pillai), 63.

Herbacetin, occurrence, in the flowers of the Indian tulip (*Thespasia populnea*) (Rao and Reddy), 372.

Heterocyclic compounds, XI (Desai and Vakil), 357.

Hydroxy flavonols, methylation, using methyl iodide and potassium carbonate (Rao and others), 495.

Integer, on the absolute weight (Gupta), 60.

Lichens, Indian, chemical investigations, I (Rao and Seshadri), 466.
Lichens, Indian, chemical investigations, II (Sastry and Seshadri), 498.

Metric for path-spaces of order two, on the existence (Seetharaman), 399.
Molecular structure of some selenium compounds determined by magnetic method (Prasad and Dharmatti), 185.
Molecular structure of some tellurium compounds determined by magnetic method (Dharmatti), 212.
Mutarotation of oxymethylene-*d*-camphor, the kinetics, Part II (Singh and Srinivasan), 21.

Naphthalene series, studies, Part V (Desai and Waravdekar), 507.
Numbers, irrational, on decimals (Vijayaraghavan), 20.
Numbers, normal (Pillai), 179.

Obituary Notice: His late Highness Maharaja Sri Krishnaraja Wadiyar Bahadur, G.C.S.I., G.B.E. (August 1940) issue
Oils, essential, derived from *Anethum soa* Roxb. Oil from the green herb and the seeds, chemical examination (Malaviya and Dutt), 251.
Olefin-bromine reaction, the kinetics. I, II (Ananthakrishnan and Venkataraman), 290, 306.
Opacity during the coagulation of the concentrated sols of zirconium and stannic hydroxides and the gelation of stannic phosphate and zirconium hydroxide gel-forming mixtures (Prasad and Modak), 235.
Optical rotatory power, dependence, on chemical constitution, studies, Part XVIII (Singh and Lal), 157.

Paper pulp from annual crops, Part I (Murti and Seshadri), 519.
Phosphorus halides and thionyl chloride on benzilic acid, action (Setlur and Nadkarny), 266.
Physiological action, dependence, on chemical constitution, studies, Part I (Singh and Lal), 230.
Point discharge current during disturbed weather at Colaba, measurement (Chiplonkar), 50.
Pressure, negative, and moisture content of a Punjab soil, a note (Midha), 270.
Pressure under a flush floor with inclined sheet piles (Ram and Vaidhianathan), 245.

Raman and infra-red spectra of α-quartz, analysis (Saksena), 93.
Raman spectra and hydroxyl frequencies of some fatty acids (Saksena), 312.
Raman spectra and the molecular structure of some aliphatic cyclic compounds (Saksena), 321.

Raman spectra of some esters of di-carboxylic acids (Saksena), 416.
Raman spectrum of sulphur (Venkateswarlu), 453.

Scattering of polarised light in colloids (Singh), 481.
Selenium iodide (Rao), 410.
Series, infinite, involving the product of Bessel functions and generalised Laguerre polynomials (Verma), 532.
Sulphuryl iodide (Rao), 354.

Tremolite to talc, alteration, in the dolomite marbles of Yellandu, Warangal District (Hyderabad, Dn.) (Jayaraman), 65.
Triangular membranes, transverse vibrations (Seth), 487.
Triplet carbon system, new bands (Asundi), 491.

Ultrasonic velocity in liquids, effect of temperature (Suryaprakasam), 341.

Values of L (n), on a table (Gupta), 407.

Waring's problem $g(6) = 73$ (Pillai), 30.
Waring's problem with indices $\geqslant n$ (Pillai), 41.
Waring's problem with powers of primes (Pillai), 202.

X-ray reflection and scattering, quantum theory, I (Raman and Nath), 83.
X-ray reflection in crystals, the two types (Raman and Nath), 427.
X-rays, modified reflection, by crystals: calcite (Bhagavantam and Bhimasenachar), 337.
X-rays, reflection, with change of frequency, Part IV (Raman and Nilakantan), 141.

Young's modulus of diamond (Pisharoty), 208.
